

OfficeServ™ WIRELESS

ENTERPRISE IN-BUILDING MOBILITY

THE NEXT
STEP IN THE
WORLD OF
CONVERGENCE

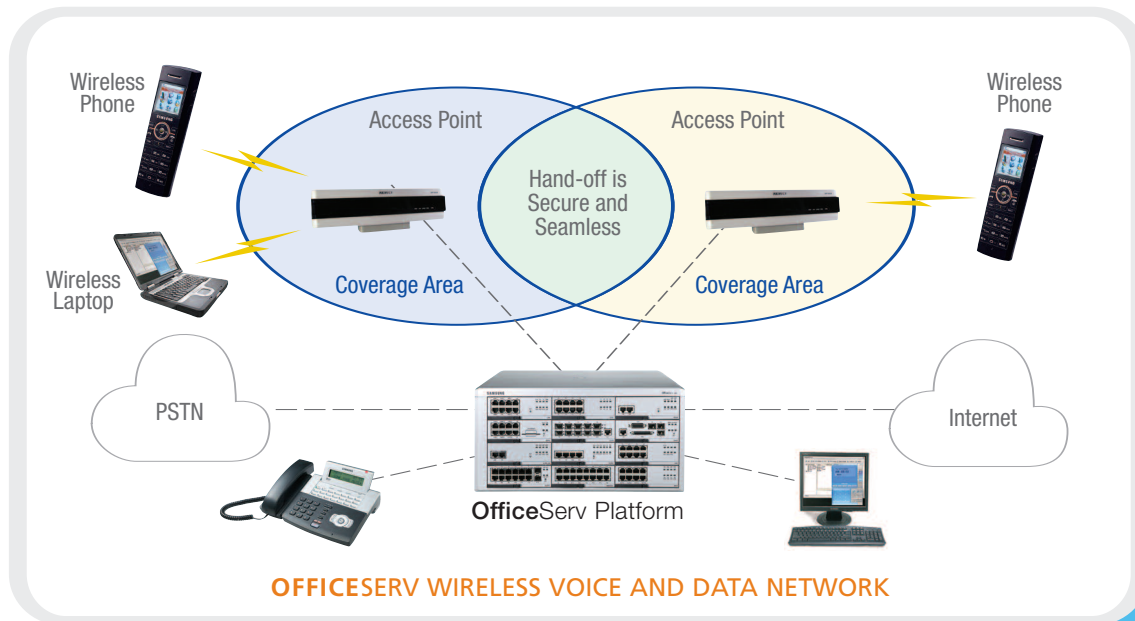

First, voice technologies converged with data. Now, wireless has converged with wire line. With the **OfficeServ™** Wireless IP solution, you have the final piece to a truly converged work environment – voice, data, wired and wireless all seamlessly integrated. Running on Samsung's **OfficeServ 7000 Series**, **OfficeServ 500** or **OfficeServ 100** IP-enabled platforms and utilizing wireless LAN access points, **OfficeServ** Wireless technology maximizes efficiency.

Staying connected, without staying tied down, unleashes optimum staff productivity. From the office to the warehouse and from the sales floor to the production department, workers can stay in touch with voice and data even while away from their desks. 802.11 a/b/g wireless LAN access points are the force behind Samsung's mobile voice and data IP solutions. They ensure crystal-clear voice connections via wireless SMT-W5100E handsets and allow workers to link wirelessly to essential business data via their PDAs and laptops.

Gain functional mobility throughout your enterprise along with heightened productivity with the **OfficeServ** Wireless solution, an easy and affordable IP technology solution from Samsung.

**BUSINESSES THAT ARE ON-THE-MOVE NEED MOBILE TECHNOLOGY
TO REMAIN STRONG CONTENDERS IN TODAY'S ECONOMY**

**OFFICESERV WIRELESS
DELIVERS A HOST OF KEY ADVANTAGES:**

- **High level feature integration**—features of phone system are seamlessly extended to the wireless handset securely and effortlessly
- **No monthly airtime charges**—wireless handsets use the unlicensed 2.4 GHz frequency band
- **Excellent voice quality**—guaranteed priority for voice IP packets
- **Easy system configuration & programming**—changing settings is a snap from anywhere through keyset or networked PC
- **Large area coverage**—supports an unlimited number of Wireless Access Points
- **Investment protection**—continue to use your wireless handsets and access points if you migrate to a larger Samsung platform

System Capacity:
